

Environmental Volunteers

Innovative environmental science education that improves student learning

Dear EV,

Do you ever wonder how many kids you teach throughout the year? Do your friends and family know the wonderful work you do with students? We are launching the Adopt-an-EV Teach-a-Thon Campaign so your friends and family can applaud your great work while helping to support the Environmental Volunteers.

How it works

Invite your friends and family to sponsor you based on the number of children or hours you will teach from September to December 15, 2009.

We will track your service hours and the number of children you teach. At the end of December we will inform your sponsors and they can send in their pledge payment.

Not planning on teaching much this semester? Your friends and family can 'adopt' an EV of their choosing. The adoptable EVs they can choose from are:

Scat Master Bob – never misses an opportunity to teach the food chain.

Semperviren Sandy – every forest hike is a tree-t.

Betty the Bay Babe -her students come out of their shells at the mudflats.

Banana Slug Sue – always in pursuit of a newt or toad, find a banana slug on the road.

All you need to do is find the sponsors, send us the pledge sheet, and we'll do the rest.

The packet contains:

Cover letter (one to mail to family and friends)

Adoptable EV Profiles (in case you are not able to do services this fall)

Pledge Form

Envelopes and stamps

Full bios and additional Adopt-an-EV materials can be found on our website at http://www.evols.org/ways_to_give.htm.

In this packet we've included all the materials for you. The time you invest in this fundraising effort has a tremendous return to the EV. Please return the pledge form to the EV office by October 3rd.

Thank you for your service and efforts to support the mission of the EV.
