

Environmental Volunteers

Hands-on environmental education programs that improve student learning since 1972

I am a volunteer with the Environmental Volunteers (The EV), an organization that inspires students to become stewards of our shared environment. As an 'EV' I present environmental science lessons in classrooms and guide students on hikes in local nature preserves.

Will you support my work by sponsoring me in the Adopt-an-EV Teach-a-Thon? By pledging a donation based on the number of hours or the number of children I will teach from September through December 15th, you will support science education in local schools, as well as help me open children's eyes to the wonders of nature.

Ways to Donate (All donations are tax deductible)

Make a Pledge

Commit to sponsoring me for each child or each hour I teach between September and December 15th.

In December you will receive a note from the EV with the number of children or hours taught. Then you will make a donation in the amount you pledged.

Donate Now — Fixed Amount

You can also donate a fixed amount to support my work. If you choose this option, there are two ways to donate:

a) by credit card at www.evol.org/donate through our secure website

b) by check sent to:

Environmental Volunteers

3921 East Bayshore Rd

Palo Alto, CA 94303

Please mention my name so that I can know to thank you. With your support I can bring even more bright-eyed children in touch with nature

Your donation to the Environmental Volunteers will directly support my work.

It will help introduce children to the wonders of nature.

And you will partner with me in developing a new generation of environmental stewards.

Thank you.
